Estimated number of people living with HIV as of Dec 27, 2016, lake County, Oregon

	Lake	
	Count	Rate*
Total	**6**	**76.6**

The Oregon Health Division HIV Surveillance Program does not publish counts of HIV cases by age, race, sex or transmission group if fewer than 10 people with HIV are believed to be living in this county, the county population is less than 10,000, or the estimated county population of any race group or age group typically used to group cases in its HIV reports is less than 50.
If you are a public health official from this county and would like to request a copy of estimates of people living with HIV in your county by age and race and sex, please contact the Oregon Health Division HIV/STD/TB Program.
* Rates are confirmed HIV cases resident in Oregon per 100,000 Oregon residents based on a 2015 population estimate.
