

Draft Options for Operationalizing the Framework for Governmental Public Health Services: “Direct Implementation Statewide”¹: (Option B)

In this model:

- Legislature mandates that all health departments must, at a minimum, provide the foundational capabilities and programs
- Local public health authorities are given a timeline by which they will complete the assessment and implement the plans to achieve full provision of governmental public health services in Oregon.

¹ Draft options were developed based on conversations at the July 8, 2014 meeting of the workgroup of the Future of Public Health Task Force. The draft options are not recommendations of the task force.
