

2012 Living Well County Data

Jackson County

Fact Sheet

INTRODUCTION

This report includes several evidence-based chronic disease self-management programs developed by the Stanford Patient Education Research Center.

They are all currently offered in Oregon:

- ***Living Well with Chronic Conditions*** is Oregon's name for the English-language version of the Stanford Chronic Disease Self-Management Program (CDSMP). It is a six-week, peer-led workshop for people with one or more chronic conditions and their support people.
- ***Tomando Control de su Salud (Tomando Control)*** is the culturally adapted, Spanish-language version of CDSMP. It is also a six-week, peer-led workshop for people living with one or more chronic conditions and their support people.
- ***Positive Self-Management Program (PSMP)*** is a seven-week, peer-led workshop designed specifically for people living with HIV/AIDS and their support people. PSMP is also offered in Spanish.
- ***Diabetes Self-Management Program (DSMP)*** is a six-week, peer-led workshop designed specifically for people living with diabetes and their support people.

The Oregon Health Authority (OHA) supports and collects data on Living Well, Tomando Control and the PSMP program. OHA does not currently support the DSMP curriculum; however, organizations providing DSMP voluntarily furnished data for this report.

PARTICIPANTS

Since 2006, 855 people have filled out all or part of a short demographic form at the initial session of a Living Well, Tomando Control, PSMP or DSMP workshop in Jackson County. In 2012, 70 percent of participants completed at least four workshop sessions — the minimum number of sessions associated with positive health outcomes such as improved exercise, communication with physicians and general health.

Participant demographics (2006–2012)

	2006–2012			U.S. Census 2010
	Ages < 60 (387)	Ages ≥ 60 (446)	Total* (855)	
Gender				
Male	32% (123)	30% (133)	31% (261)	49%
Female	68% (264)	70% (313)	69% (593)	51%
Race				
African American	3% (12)	1% (5)	2% (17)	1%
American Indian/ Alaska Native	6% (25)	3% (15)	5% (40)	3%
Asian/Pacific Islander	--% (--)	--% (--)	1% (6)	3%
White	72% (277)	75% (333)	73% (620)	92%
Hispanic/ Latino Ethnicity	6% (22)	5% (23)	6% (51)	11%
Age				
Range	13–59	60–95	13–95	
Mean (U.S. Census Median)	48	71	61	42

Participants self-identify their race and ethnicity and can choose all that apply. Race from the U.S. Census includes those who chose multiple racial categories.

* Total includes those of unknown age, gender, and race.

-- Fewer than five individuals.

In 2012, Jackson County participants reported having an average of 3.5 chronic conditions.

Overall, participants reported having a variety of chronic health conditions. The following graph includes those conditions; however, the graph does not include chronic conditions participants may have added to the form.

Self-reported chronic conditions (2006–2012)

In 2012, 35 percent of Jackson County chronic disease self-management program participants were tobacco users.

WORKSHOPS

Since 2006, Jackson County has reported data on 90 workshops including:

- 86 Living Well workshops;
- Three Tomando Control workshops;
- One Positive Self-Management Program workshop;
- No Diabetes Self-Management Program workshops.

All workshops (Living Well, Tomando Control, PSMP) by year

Between 2006 and 2012, 28 Jackson County locations hosted chronic disease self-management workshops. All workshops were located in the seven Jackson County cities shown on the following map. The number of workshop locations for each city is included with the city name.

Most Jackson County workshops were held at health care, senior, educational and library facilities.

LEADERS

In Jackson County, approximately 88 leaders have been trained in one or more Stanford programs. Of those, 78 leaders were trained in Living Well, 10 in Tomando Control and two in DSMP. Leaders can be trained in more than one program. Of these trained leaders, 64 (73 percent) have led one or more workshops.
