Notes

Fecal Coliform: any violation of the maximum contaminant level (MCL) for Fecal Coliform or E.Coli bacteria.

SWTR: any failure to adequately treat drinking water to meet the requirements of the Surface Water Treatment Rule.

Unfiltered: any system that is currently unfiltered but is either required to install filtration or find a new source of water

NO3: any system which exceeded the MCL for Nitrate (10mg/l)

Other Chems: any system which exceeded the MCL for any of the other 67 chemicals with MCLs

Lead / Copper: any system which exceeded either the Lead or Copper action level in either of the system's last two rounds of testing.

Total Coliform: any MCL violation for Total Coliform .

Comm. WS : community water system -- a water system which serves 25 or more year round residents or has 15 or more connections.

NTNC WS: a nontransient noncommunity water system -- a water system which serves 25 or more of the same users at least 6 months out of the year, but the users are not year round residents. For example: schools and work sites .

Transient WS : a transient noncommunity water system -- serves at least 10 people a day for at least 60 days out of the year. R Only those serving 500 or more persons a day are included. in the benchmarks. For example: restaurants, parks, and campgrounds .

* Number of Violations for 1996 for each Benchmark item except for Pb/Cu and Unfiltered. Pb/Cu is "Y" if system exceeded either the lead or copper action level in last two rounds. Unfiltered is "Y" if the system is unfiltered but must install filtration to meet the SWTR.
