

ORCHIDS-MDE Release Information

March 31, 2008

Why am I receiving this information?

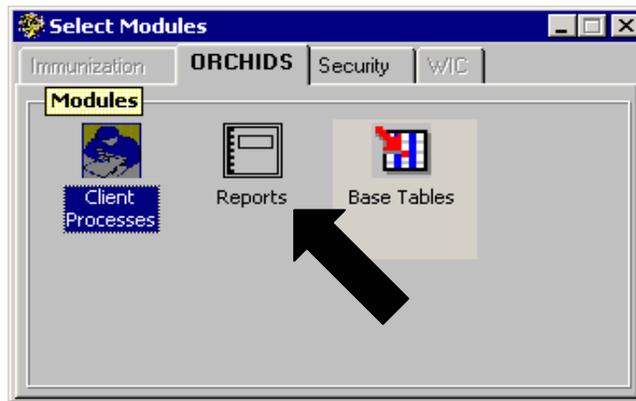

Every two months, a new version of ORCHIDS-MDE is released in FamilyNet. We do this so that we can add improvements to ORCHIDS-MDE or fix “bugs” in the data system. To access the new version, you do not have to do anything; FamilyNet will update itself automatically when you log for the first time on or after Monday, March 31, 2008.

With each new release of ORCHIDS-MDE, you will receive this notice that describes new improvements and fixes in the system.

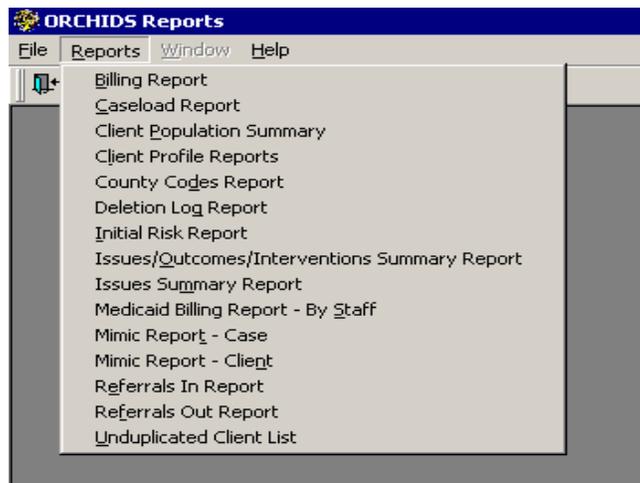

What’s new and improved . . .

1. New Reports

Access reports by selecting the ORCHIDS Reports Module.

Select the report you want to generate and click the **Run** button  on your toolbar.

Below is a list of new reports, followed by a brief description of their purposes and main features. A more detailed report guide will appear in Spring of 2008.

Referrals Out Report displays counts and percentages for referrals out of the High Risk and Infant Programs (Babies First! and CaCoon), and summarizes counts and percentages of clients who began receiving the referral services or who were not eligible for the services.

Deletion Log Report captures all the deletions made by the System Administrator. This report is a log of all deleted billing records, visits, and cases. It is only available to the System Administrator.

2. We have updated the MCM Billing Tab by deleting four V-codes in the Billing Box. The V-codes V22, V22.2, V23, and V25 no longer displays in the drop-down list in the Diagnosis field.

Known Issues . . .

Issue 1: The Issues/Outcomes/Interventions Summary Report is complex. It is easy to misinterpret this report.

Solution 1: Please contact your regional nurse consultant if you have any questions about interpreting this report. The project team is working on a user guide that describes all the reports and plans to publish the guide this Spring.

Issue 2: I am getting an hourglass and cannot make changes to the client's record.

Solution 2: The hourglass means that there may be a potential lock in the system. When this occurs please call App Support (971) 673-0382. To prevent system locks please close all message windows, especially the "Save Performed" message, by selecting the "ok" button.

Have questions or need more information? Call ORCHIDS Application Support, (971) 673-0382.
