Ebola: Know Your Risk

NO RISK
No travel to Liberia, Sierra Leone or Guinea. No contact with recent travelers to/from those countries.

(On Oct. 20 the World Health Organization removed Nigeria from the affected countries.)

LOW RISK
In the past 21 days either resided in, or traveled to, Liberia, Sierra Leone or Guinea but had no exposure to an ill person.

SOME RISK
• Shared a household with Ebola patient.
• Provided healthcare to Ebola patient.
• Brief contact with Ebola patient without protection.

HIGH RISK
• Direct contact with infected blood or bodily fluids.
• Contact with dead Ebola victim.
• Needle stick from needle used in infected person.
