OL 2015, ch. 786

RULE SUMMARY

The Oregon Health Authority (Authority), Public Health Division is proposing to permanently adopt administrative rules in chapter 333, division 16 related to high priority chemicals of concern for children's health.

SB 478 (Oregon Laws 2015, chapter 786) was passed by the Oregon Legislature during the 2015 legislative session. The law requires the Authority to maintain a list of high priority chemicals of concern for children's health when used in children's products. The law states that the initial Authority list shall "include on the list chemicals that are listed on the Washington State Department of Ecology's Reporting List of Chemicals of High Concern to Children". These proposed rules establish the initial list of high priority chemicals of concern for children's health when used in children's products that a manufacturer of children's products sold or offered for sale in this state shall provide biennial notice to the Oregon Health Authority beginning on January 1, 2018. This rulemaking is only establishing the list of high priority chemicals of concern for children's health when used in children's products. No requirements are being imposed on manufacturers at this time.

The Agency requests public comment on whether other options should be considered for achieving the rule's substantive goals while reducing negative economic impact of the rule on business.
