

## Quick reference (Volume 2)

| Summary of Oregon Vital Events, 2011  |                                   |   |
|---|-----------------------------------|---|
| <b>Population</b>   | 3,857,625                         | The population increased 13,430, or 0.3 percent since 2010.   |
|   |                                   |   |
| <b>Death</b><br>Number<br>Rate  | <b>Residents</b><br>32,731<br>8.5 | The number of deaths increased by 832.<br>The rate increased by 2.4 percent.  |
|   |                                   |   |
| <b>Infant deaths</b><br>Number<br>Rate  | <b>Residents</b><br>210<br>4.7    | The number of infant death decreased by 15.<br>The rate decreased by 4.1 percent.   |
|   |                                   |   |
| <b>Neonatal deaths</b><br>Number<br>Rate  | <b>Residents</b><br>141<br>3.1    | The number of neonatal deaths decreased by 12.<br>The rate decreased by 8.8 percent.  |
|   |                                   |   |
| <b>Maternal deaths</b><br>Number<br>Rate  | <b>Residents</b><br>10<br>22.2    | Oregon's average maternal death rate 2007-2011 (14.8) was 27.7 percent lower than the average U.S. rate for 2007-2011 (20.8). |
|   |                                   |   |
| Crude death rates are per 1,000 population; infant and neonatal rates per 1,000 live resident births; maternal death rate per 100,000 live resident births. In 2006, the method of calculating maternal death changed to include a longer time frame after the birth. |                                   |   |
