

# HIV-Positive Adults in Care in Oregon, Medical Monitoring Project, 2009-2014

## The Medical Monitoring Project (MMP)

- MMP is a surveillance system funded by the Centers for Disease Control and Prevention and implemented by local health departments. It collects behavioral and medical data about HIV-positive adults receiving medical care in the United States.
- From 2009 to 2014, MMP interviewed 1,558 HIV-positive adults receiving care in Oregon. Their responses reflect their experiences during the 12 months before their interview, unless otherwise noted. All data presented are weighted.
- The information in this factsheet can guide policy decisions, resource allocation, and evaluation of treatment and prevention initiatives.

## Characteristics of HIV-Positive Adults in Care in Oregon, 2009-2014

- 87% were male and 12% were female
- 67% were men who have sex with men
- 7% were black/African-American, 10% were Hispanic or Latino, and 74% were white
- 19% had been diagnosed with HIV less than 5 years at the time of their interview
- 47% had private insurance, 50% public insurance only, and 2% had Ryan White coverage only
- 37% had a household income at or below the poverty line
- 8% experienced homelessness

## HIV Treatment and Prevention Measures among HIV-Positive Adults in Care in Oregon, Medical Monitoring Project (MMP), 2009-2014 \*

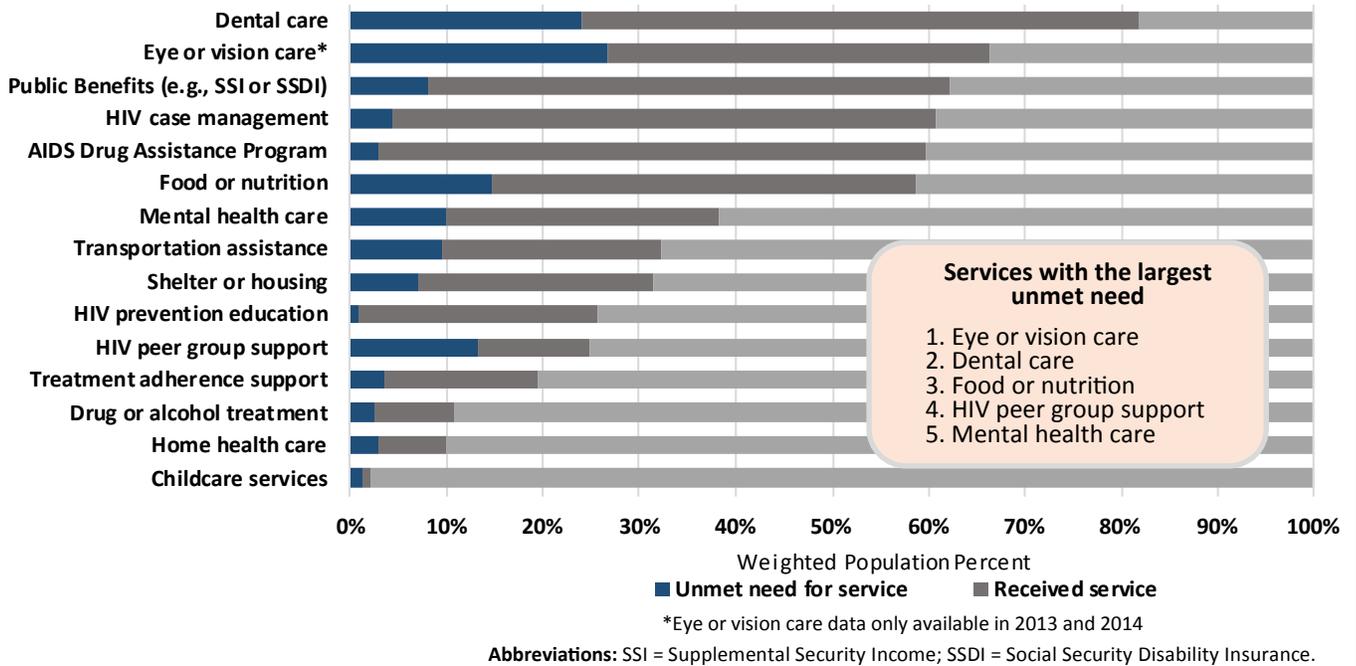

Characteristic	Prescription of ART <sup>1,2</sup> (%)	ART Dose Adherence <sup>3</sup> (%)	Sustained Viral Suppression <sup>2,5</sup> (%)	Receipt of Condoms <sup>3,6</sup> (%)	HIV Prevention Counseling <sup>3,7</sup> (%)
<b>Total</b>	<b>95</b>	<b>88</b>	<b>72</b>	<b>45</b>	<b>31</b>
<b>Age</b>					
18-29 years	82	87	45	59	57
30-39 years	92	83	63	58	45
40-49 years	97	88	71	49	34
≥50 years	97	89	81	36	22
<b>Gender</b>					
Male	95	88	73	46	31
Female	94	86	70	43	38
<b>Race/Ethnicity</b>					
Black/African-American	94	87	64	56	46
Hispanic/Latino	95	84	74	60	44
White	96	88	73	42	28
<b>Insurance</b>					
Any Private Insurance	93	91	71	45	33
Public Insurance Only	97	85	73	44	30
RW <sup>7</sup> Only	98	89	82	61	32
<b>Sexual Behavior</b>					
MSM <sup>8</sup>	95	87	71	48	30
MSW <sup>9</sup>	95	90	71	35	33
WSM <sup>10</sup>	94	86	69	43	38

All data are from the past 12 months unless specified otherwise; <sup>1</sup>Antiretroviral therapy; <sup>2</sup>Documented in the medical record; <sup>3</sup>Self-reported; <sup>4</sup>Past three days;

<sup>5</sup>All viral loads in past 12 months undetectable or <200 copies/ml; <sup>6</sup>Received free condoms, not counting those given by a friend, relative, or sex partner;

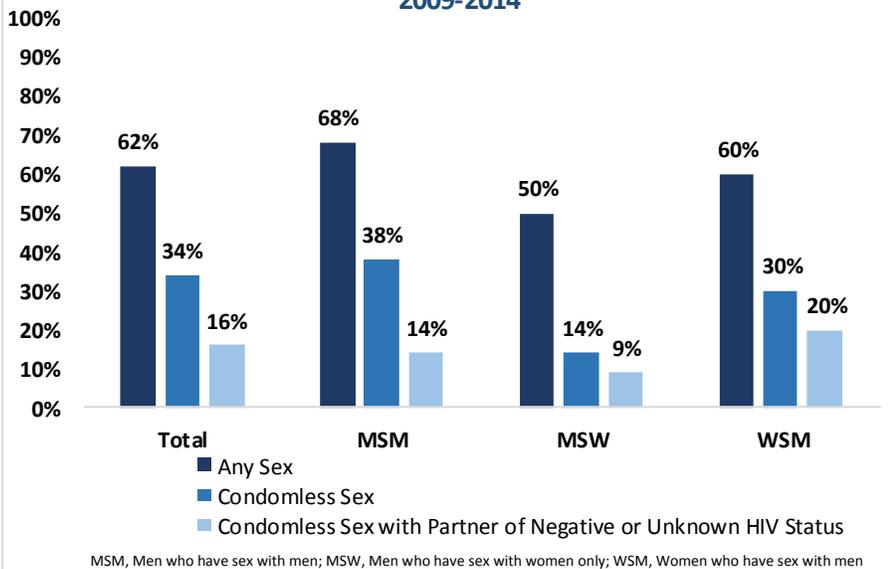

<sup>7</sup>Given by a healthcare provider; <sup>8</sup>Men who have sex with men; <sup>9</sup>Men who have sex with women only; <sup>10</sup>Women who have sex with men

## Met and Unmet Needs for Services among HIV-Positive Adults in Care in Oregon, Medical Monitoring Project, 2009 – 2014

## Behavioral and Clinical Characteristics

### Sexual Behavior in the Past 12 Months among HIV-Positive Adults in Care in Oregon, Medical Monitoring Project, 2009-2014

Notes: any sex = any oral, anal, or vaginal sex from 2009 to 2013, but in 2014 oral sex was excluded; condomless sex = vaginal or anal sex without a condom; condomless sex with HIV-negative or unknown-status partner=engaged in condomless sex with an HIV-negative partner or a partner whose status was unknown; all sexual behavior information is self-reported.

Documentation of MMP methods can be found here: [http://www.cdc.gov/hiv/pdf/HSSR\\_MMP\\_2010-PDF01.pdf](http://www.cdc.gov/hiv/pdf/HSSR_MMP_2010-PDF01.pdf)

### Substance Use<sup>1</sup>

- 41% were current smokers
- 16% engaged in binge drinking<sup>2</sup>
- 6% used injection drugs<sup>3</sup>

<sup>1</sup>Self-reported

<sup>2</sup>Binge drinking is defined for men as 5 or more drinks in a sitting in the past 30 days and for women as 4 or more drinks in a sitting in the past 30 days.

<sup>3</sup>Past 12 months

### STD Testing Among Sexually Active Persons in the Past 12 Months

- 69% were tested for syphilis
- 32% were tested for gonorrhea
- 32% were tested for chlamydia

### Influenza Vaccination in the Past 12 Months

- 84% received an influenza vaccine
