	50-59	28	177.6
	60+	22	63.2
<b>Total</b>		<b>85</b>	<b>78.9</b>

\* Rates are confirmed HIV cases resident in Oregon per 100,000 Oregon residents based on a 2015 population estimate.

\*\* Risk group represents the most likely transmission route

'Pediatric' includes people who were diagnosed with HIV infection before the age of 13, usually from their mother.

'Sex with men' includes men who report ever having sex with men.

'Heterosexual/Other' includes routes of transmission for person diagnosed 13 years of age and older and who deny the other risk categories

\*\*\* 'Unknown' or 'Other' race was combined under 'Two or more races'
