**RULE SUMMARY**

The Oregon Health Authority, Public Health Division, Acute and Communicable Disease Prevention section is proposing to permanently amend rules in chapter 333, divisions 17, 18, 19 & 56 pertaining to new or modified definitions and to new disease reporting requirements. The new and modified definitions assure that Oregon's definitions are harmonized with national definitions for lead poisoning and carbapenem antibiotic resistance, standardized in terms of laboratory specimen descriptors, and clarified with regard to defining syringes and excluding susceptible individuals in outbreak settings. The new disease reporting requirements include the addition of amebic infections of the central nervous system, coccidioidomycosis, and isolate-submission requirements for *Coccidioides* spp and novel influenza.

The Agency requests public comment on whether other options should be considered for achieving the rule's substantive goals while reducing negative economic impact of the rule on business.
