

Class announcement of a Certified Pool Operator® Class offered in 2016

The need for qualified swimming pool and spa operators has never been greater. Managing a pool requires knowledge of chemistry, physics, biology, and math skills. The National Swimming Pool Foundation works to make all pools safer for users and operators, through education and research.

The CPO® course is a nationally recognized program for commercial pool and spa operators. The course was developed by the National Swimming Pool Foundation (NSPF) whose mission is to encourage healthier living through aquatic education and research. That research goes into the lesson and materials in the CPO Manual. The CPO certification is valid for five years and is recognized throughout the United States and the world. Certification requires passing a written, open book test with a score of at least 75 percent. Those that pass the course will receive a permanent registration number as Certified Pool/Spa Operators. The CPO certification is also an assurance to facility owners and managers that the pool operator and maintenance staff are trained in the most advanced techniques. As of January 2009 all general-use pools (municipal or general admission pools) in the State of Oregon will be required to have staff with this certification.

A two-day class is offered by John Mason, a Registered Environmental Health Specialist with the State of Oregon, and Registered Instructor of the Certified Pool Operators program through the NSPF (www.nspf.org). John draws on over 15 years of pool operations experience to provide insight and analogies to help you better understand this diverse and often complicated career.

You are encouraged to sign up for this local class. Upon receipt of registration material and payment, a CPO handbook will be mailed to you. All lecture materials, handouts, practice calculations and reference dosing charts will come from the CPO handbook. The course is taught so that the CPO manual will serve as a reference during class and an invaluable resource and reference guide to the CPO on the job. All topics covered in this 250 page color manual are written by experts with long experience on the subjects taught. A partial list of the chapters includes;

Pool and Spa management;	Water treatment;	Automatic chemical feed
Essential calculations;	Circulation and filtration;	equipment;
Contamination &	Water balance;	Government requirements;
Disinfection;	Spa and therapy operations;	Trouble shooting.
Chemistry & test kits;	Maintenance systems;	

You are urged to register as early as possible so that the CPO handbook, practice math problems and class material can be sent to you early. The more of the CPO manual you can read before class the better prepared you will be to absorb the lecture topics and the classroom practice handouts.

To arrange to pay by credit card, please send all the Student Registration information to the Pool School email address below. An invoice with credit card payment options will be emailed to you. To register by mail please complete the attached Student Registration form and mail it with payment to the following address:

Pool School of Oregon
P.O. Box 874
Bend, OR 97709

For questions, contact: John Mason at poolschooloregon@q.com or at 541.383.3212.

STUDENT REGISTRATION FORM

Please provide one complete registration form for each student

Certified Pool Operators Class

- April 12 & 13, 2016 Medford, OR 8:00 a.m. to 5:00 p.m. each day
