- 

### PROGRAM UPDATE

#### 1. Breast and Cervical Cancer TREATMENT Program (BCCTP)

ScreenWise received several inquires this month regarding access to the Breast and Cervical Cancer Treatment Program. The BCCTP is outside the purview of our program, however, you may access documents on our website. [Click here](#) to find more information.

---

### DID YOU KNOW?

#### Every woman should be screened for hereditary breast and ovarian cancer syndrome

The USPSTF recommends that "primary care providers screen women who have family members with breast, ovarian, tubal, or peritoneal cancer with 1 of several screening tools designed to identify a family history that may be associated with an increased risk" and refer women with positive screening for genetic counseling and, if indicated after counseling, *BRCA* testing.

#### Genetic counseling and testing must be covered without cost sharing by a health care plan or issuer

A health insurance plan or issuer must cover without cost sharing recommended genetic counseling and *BRCA* genetic testing for a woman with a positive screening for family history that may be associated with an increased risk for potentially harmful mutations in breast cancer susceptibility genes (*BRCA1* or *BRCA2*).
