

School-Based Health Centers

General Information

What is an SBHC?

School-Based Health Centers (SBHCs) are medical clinics that offer primary care services either within or on the grounds of a school. With easy access to health care in a school setting, SBHCs reduce barriers such as cost, transportation, and concerns surrounding confidentiality that often keep children and youth from seeking the health services they need. SBHCs provide a full range of physical, mental and preventive health services to all students, regardless of their ability to pay.

Each SBHC is staffed by a primary care provider (i.e., doctor, nurse practitioner or physician assistant), other medical, mental, or dental health professionals and support staff such as a receptionist.

SBHCs have existed in Oregon since 1986 and succeed through unique public-private partnerships between the Oregon Public Health Division, school districts, county public health departments, CCOs and private payors, providers, parents, students, and community members.

What do SBHCs do?

SBHCs provide patient-centered care services for all students whether or not they have health insurance coverage.

SBHCs can:

- Perform routine physicals, well-child exams, and sports exams;
- Diagnose and treat acute and chronic illnesses;
- Treat minor injuries/illnesses;
- Provide vision, dental and blood pressure screenings;
- Administer vaccinations;
- Prevent and treat alcohol and drug problems;
- Deliver preventive health and wellness messaging;
- Provide and/or connect students with mental health counseling;
- Provide reproductive health services;
- Give classroom presentations on health and wellness;
- Prescribe medication;
- Help students find social supports.

School-based health centers...

- Improve access to affordable and high quality physical, mental, dental and preventive health services.
- Treat children and youth who otherwise may not receive care.
- Reduce costs related to unnecessary hospital stays and use of emergency rooms.
- Save parents time by reducing missed work hours.
- Get students back to the classroom faster and ready to learn.
- Support students while they take charge of their health care as they become young adults.
- Meet community needs through patient-centered care.
