This tool will help you verify that all your patients were entered in ALERT by the ideal **"Data Entry Timeline"**, and that your vaccine codes were used correctly before the time comes when you'll receive a quarterly bill.

This bill is for all the vaccines coded "B" (Billable).

Using this timeline, making your corrections and running the ALERT Billable Report will help you anticipate how many doses and dollars your invoice will be coming for, by the end of the "Bill Issued" date. Remember, if you make corrections after you've done all this, you have to run the ALERT report again.
